Composition	:	Admixture of Acrylic Emulsion, Titanium Dioxide
Appearance	:	White thick Paste.
Squeegee	:	Soft - medium Durometer
Stencil	:	water - resistant
Wash-up	:	water /Mild detergent
Reducer	:	water upto 2-3%
Curing /Fusion	:	320° f /160° c
Ph Value	:	8-8.5

Application:

Texaprint KXX is thick highly covering paste with outstanding elasticity whenever printed on extensible or knitted fabric and stretched Texaprint remains unaltered without breaking or cracking, these properties make it suitable for knitwear printing. Prints have good luster with soft touch, good adherence and wash resistance. we recommend to add 2% fixcer to the paste before Printing.

Pot Life of Paste after adding fixcer is around 8-10 hrs.

Care must be taken to check the required fastness properties before production as fastness varies on different fabrics also finish on the fabric affect the fastness.

Shelf life: Texaprint is not subject to a particular limitation of its shelf life, as the ink contains water. It must be protected from fungus. We recommend to close opened cans very thoroughly.

Mix thoroughly before use

Water-based Paste

PVC Free

Phthalate Free
