

TEXAPRINT M-90W

Introduction

Texaprint M-90W is ready to use water- based paste suitable for Rotary printing m/c. on any type of fabric.

Technical Information:

Main Composition	:	Admixture of Acrylic emulsion, Titanium Dioxide, Emulsifier etc.
Appearance	:	Thick Paste
Squeegee	:	Soft-Medium Durometer
Stencil	:	Water-resistant
Wash-up	:	Water / Mild detergent
Reducer	:	Water upto 2-3%
Curing / Fusion	:	320° f /160° C

Application:

Texaprint M-90W is thick highly covering paste specially prepared for Rotary printing m/c. after addition of pigment color. Prints will be more bright in comparison with Prints of regular white ink even with less percentage of Pigment. Required fixcer is tobe added before printing.

Pot life of Paste after adding fixcer is around 8-10 hrs.

Care must be taken to check the required fastness properties before production as fastness varies on different fabrics also finish on the fabric affect the fastness.

Shelf life: Texaprint is not subject to a particular limitation of its shelf life, as the ink contains water. It must be protected from fungus. We recommend to close opened cans very thoroughly.

Mix well before use.
